

Chipper and Flaker

Knives & Components

KHOSLA TOOLS & EQUIPMENT

KHOSLA chipper, flaker and waferizer knives, chipper components and wear parts are used worldwide in the pulp & paper, plywood, chipping and sawmill industries. Khosla's modern factory supply knives, anvils, counter knives, knife clamps, knife holders, wear parts and other components for any chipper or flaker make and model.

4220-4228

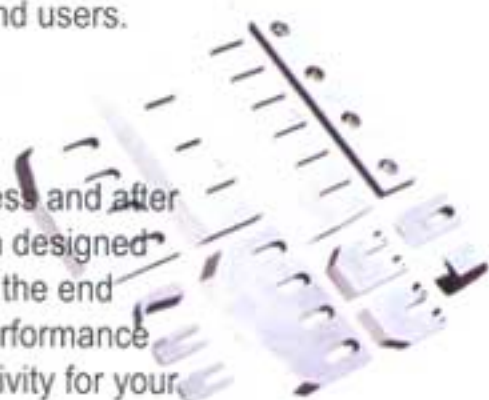

Dedicated to Total Quality

Tool performance is an important factor in any chipping operation. KTE chipper knives are used in chipping frozen wood, softwood and mixed tropical hardwood. KTE maximizes tool performance by customizing knives for each application.

Correct hardness and very best raw materials are important factors for superior tool performance. Optimal cutting characteristics are achieved through extensive experience and cooperation with leading end users.

KTE's manufacturing process and after sales service have all been designed to provide optimal tools for the end user. After all, optimized performance translates to better productivity for your operations.

Chipper & Flaker Knives:

Chipper Knives

Dimensions based on application and machinery.
Hardness HRC 56 - 60
